

## **JOB DESCRIPTION QUALIFICATIONS**

---

### **Job Description (2 positions)**

1. Provide support to a Senior Oil & Gas analyst.
2. Maintain and enhance company models for Canadian based International E&P companies and/or Oil Sands companies.
3. Maintain relationships with coverage companies in order to stay current with their operations.
4. Preparation of company reports and frequent presentations at the firm's Sales and Trading meetings.
5. Requires a high energy level in a demanding work environment (long days).

### **Education Requirement**

- The candidate should have a financial or business oriented undergraduate degree, such as a B. Comm. or a B. Econ.
- Should be a CFA charter holder, or be a qualified Chartered Accountant, or be enrolled in the CFA (or a similar) program
- The candidate must have a high degree of Excel spreadsheet knowledge and competence
- Good oral and written communication skills required

### **Work Experience**

This is a Senior Associate position and, therefore, the candidate's key work experience should relate to the analysis of financial statements and financial modeling. Employment experience in the petroleum or investment industry would be considered an asset, but it is not required.

### **Compensation**

Compensation will initially be a guaranteed salary with benefits, at an above-average level for relative age and experience in the investment banking industry. After a probationary period, this person will participate in a discretionary performance-based bonus program.

### **Start Date**

ASAP

### **Location**

Calgary, Alberta

### **Applications (no phone calls please)**
